**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/10/2008 has been entered.

***Response to Arguments***

2. Applicant's arguments with respect to the newly amended claim 227 have been fully considered and are persuasive.

***Allowable Subject Matter***

3. Claims 227-240 and 242-244 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding claim 227, the claim is allowable because the prior art alone or in combination fails to disclose a system for in vitro producing a mammalian pre-embryo that comprises two separate air-tight chambers wherein said at least two separate air-tight chambers constitute a main chamber and a residence chamber wherein the

oxygen tension of one air-tight chamber is changed independent of the oxygen tension of the other chamber and an airlock communicating with but separate from the two chamber(the main chamber and the residence chamber) mentioned above.

The closely related prior art references to the applicant's invention are Findley et al. (US Patent 4892830) , Lindenberg et al. (WO99/67365) and Ellington et al. (US Patent 6140121)

Findley et al. teaches a system for in vitro producing a mammalian pre-embryo (see column 1 lines 7-10), said system comprising an apparatus 11 (called incubator, see column 3 line 39) having at least two separate air- tight chambers (13) and 57 (called airlock) and a residence compartment (68)(called storage compartment) (see Fig. 3 and column 3 line 40 and column 6 line 41), where said at least one residence chamber/compartment (68) are smaller than said main chamber (15) and are located inside the main chamber (see Fig. 6), said apparatus comprising at least one entrance port (59) (called internal door of air lock) capable of communicating with the means for obtaining the mammalian oocyte and/or the mammalian spermatozoa, and an exit port for withdrawal of the pre-embryo (61) (called external door of air lock, see column 6 lines 37-43 and Fig.3), as well as a communication port (59) (called internal door) between said at least two chambers allowing transfer of oocyte, spermatozoa and/or pre-embryo between the chambers (see column 6 lines 40-42 and Fig. 3 or Fig. 4).

Findley et al. fails to teach the means for obtaining a mammalian oocyte, means for obtaining mammalian spermatozoa and that the oxygen tension of the main chamber is changed independently of the oxygen chamber of residence. Furthermore, the Findley reference fails to disclose that the residence compartment/chamber is an air-tight chamber located in /or attached to the main chamber.

Lindenberg et al. teaches the means for obtaining a mammalian oocyte (17g Cook needle, syringe and tube) (see page 11 lines 5-70), but mute about means for obtaining a mammalian spermatozoa.

Ellington et al. teaches the means for obtaining sperm comprising tubes, a 27 gauge needle and 1 ml syringe (see column 14 lines 44-50).

None of the other reference above namely Lindenberg et al. and Ellington et al. discloses that the residence compartment/chamber is an air-tight chamber located in /or attached to the main chamber and that the oxygen tension of the main chamber is changed independently of the oxygen tension of residence compartment/ chamber. Therefore, the above prior arts alone or in combination do not teach or suggest the applicant's claimed invention as presented in claim 227.

Claims 228-240 and 242-244 are allowed because of their direct/indirect dependence on the allow claim 227.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
